Re: EE Web Design

ee-web design built our new web site in 2011, and have been providing support since the completion of the build. This has included updating information and adding new features.

This new site allowed the company's web presence to reflect the current available technology, with the site available to view on a wide variety of devices. It has also allowed us to easily make changes to the content on the site, thus keeping the site fresh, with up to date information of our projects.

The experience of working with ee-web design is pleasant and easy, with them being pragmatic, efficient and helpful. They are responsive, with the work completed expeditiously. The unsolicited advice given to improve the site design has proved invaluable in the success of the final outcome. We would recommend involving ee-web design in the construction of a website, as their involvement will undoubtedly assist with achieving the desired outcome.

Yours faithfully

Ferhan Azman
Director
