Testimonial Edward Eldon EE Web Design

I asked EE Web Design to look at my website with a view of creating a new more modern and user friendly one. After several meetings with Edward and talking to him on the telephone a number of dummy sites were created from which I picked the look I would like to go with, from this Edward created my new website tailor made to MJP Autos.

I had a website which was quickly made and just left floating around online, I felt it never quite came up to my expectations. With Edward I felt there was never too much of a rush to get to the finished product and only when I was 100% satisfied did it go live.

I think that anyone who is thinking of having a website made should do so through EE Web Design.

I'd like to thank Edward and EE Web Design for my website and continued help.

Yours Faithfully,

Mr M J Purchase
